

# The New DispoPilot.guide Logistics. Communication. Navigation.

Turn your drivers into logistics managers – with the new DispoPilot.guide of FleetBoard. No matter whether it is installed in the driver's cabin or used as a mobile device: this high-performance tool supports your drivers in making all processes concerned with transport and orders more efficient.

The new DispoPilot.guide is the modern tool for your drivers. Both on tour on the road and at the customer site it offers the ideal prerequisites for optimum order processing, reliable communication with the dispatch office, and the best truck-specific navigation by TomTom. The DispoPilot.guide is equipped with a 7-inch display and a 5-megapixel camera. It can be operated intuitively and, thus, makes the driver's everyday life not only simpler, but also more efficient.

### Logistics: clearly efficient.

With one hand movement, the DispoPilot.guide can be taken out of the cradle in the driver's cabin and becomes a practical tool, even with the ignition switched off or outside of the vehicle. The DispoPilot.guide can be operated up to 3 hours by means of the rechargeable battery.

The FleetBoard service Logistics Management provides your drivers with all details on the orders, presented in a clear-to-overview manner on their tablets. All processing steps can be captured in a simple way and be transferred to the central office.

### Communications: simplified.

The drivers can transmit and receive text messages over the high-resolution multi-touchscreen of the tablet. This uncomplicated communication via the Logistics Management and Messaging services ensures that orders can be processed reliably and helps to avoid misunderstandings.

### Navigation: truck-optimized and live.

The truck-specific navigation provides map material for 46 countries and includes map updates which are performed in regular intervals and free of charge. In addition, live traffic information is available for 29 European countries. It serves to calculate the expected time of arrival (ETA), which will subsequently be displayed for the dispatch office in FleetBoard Cockpit. The live traffic information is included in the price for the duration of 36 months.

#### The new DispoPilot.guide – convincing benefits:

- Efficient order processing
- Simple communication by means of text messages
- Best truck-specific navigation by TomTom
- Europe-wide map updates, free of charge
- Live traffic included for 36 months
- ETA under consideration of live traffic information
